

## LESSONS LEARNED:

- ANSIBLE VERSION 2.4
- ceph-ansible version 3.0.34
- “Quotes” around the IP ranges in ALL.YML
- Application tag on pools now
- Monitors section must be in the inventory file

## How to Install CEPH using ceph-ansible

<https://github.com/ceph/ceph-ansible>

<http://docs.ceph.com/ceph-ansible/master/>

## In order to run CEPH-ANSIBLE from a CONTROL NODE:

- The control node must have ssh access as root to all MON, RGW, & OSD nodes
- All OSD nodes must have the public and private IPs configured first
- Ansible 2.4+ is required
  - Set up Ansible in a virtual env
  - <http://ops-docs.ece.clifton.net/deployment/environment/>
    - apt-get install python3-venv
    - python3 -m venv venv
    - . venv/bin/activate
- PIP Install:
  - Notario
    - pip install netaddr notario
  - Netaddr

## Network info:

- [https://github.com/clifton.com/cloud-services/openstack-upgrades/blob/master/inventory/group\\_vars/mimi-a/network\\_config.yml](https://github.com/clifton.com/cloud-services/openstack-upgrades/blob/master/inventory/group_vars/mimi-a/network_config.yml)

## CEPH-ANSIBLE OVERVIEW:

<http://docs.ceph.com/ceph-ansible/master/>

After you've cloned the `ceph-ansible` repository, selected your branch and installed Ansible then you'll need to create your inventory file, playbook and configuration for your Ceph cluster.

The following config options are required to be changed on all installations but there could be other required options depending on your OSD scenario selection or other aspects of your cluster.

- `ceph_origin`
- `ceph_stable_release`
- `public_network`
- `osd_scenario`
- `monitor_interface` or `monitor_address`
- `radosgw_interface` or `radosgw_address`

---

#### **MIMI EXAMPLE:**

#### **JUMP to the CONTROL NODE:**

```
VATAPL-W0M9G8WM:~ pclift200$ ssh-add
VATAPL-W0M9G8WM:~ pclift200$ jump sre@osctrl-ch2-f01.ece.clifton.net
Warning: Permanently added 'osctrl-ch2-f01.ece.clifton.net' (ECDSA) to the list of known hosts.
Welcome to Ubuntu 16.04.6 LTS (GNU/Linux 4.15.0-45-generic x86_64)
```

```
* Documentation: https://help.ubuntu.com

* Support:       https://ubuntu.com/advantage
```

```
Last login: Fri Mar 1 15:18:47 2019 from 10.54.35.208
```

```
sre@osctrl-ch2-f01:~$
```

```
sre@osctrl-ch2-f01:~$ sudo su -
```

```
Remember to clear /tmp/.ansible-vault-cache.pkl when done!
```

```
root@osctrl-ch2-f01:~#
```

#### **INSTALL CEPH-ANSIBLE in /opt:**

Proxy details: <http://ops-docs.ece.clifton.net/guides/proxy>

```
root@osctrl-mimi-a01:/opt# git config --get http.proxy
```

```
root@osctrl-mimi-a01:/opt# git config --global http.proxy http://cldinfprxy.ece.clifton.net:8888
```

Or

```
git config --global http.proxy http://cloud-proxy.gslb2.clifton.com:8888
```

```
root@osctrl-ch2-f01:/opt# git config --global http.proxy http://cloud-proxy.gslb2.clifton.com:8888
```

```
root@osctrl-ch2-f01:/opt# git clone https://github.com/ceph/ceph-ansible.git
```

```

## CHECKOUT STABLE VERSION OF CEPH-ANSIBLE:

```
root@osctrl-mimi-a01:/opt/ceph-ansible# git checkout v3.0.34
```

Note: checking out 'v3.0.34'.

You are in 'detached HEAD' state. You can look around, make experimental changes and commit them, and you can discard any commits you make in this state without impacting any branches by performing another checkout.

If you want to create a new branch to retain commits you create, you may do so (now or later) by using -b with the checkout command again. Example:

```
git checkout -b <new-branch-name>
```

HEAD is now at f492b0e... FIX: run restart scripts in `noexec` /tmp

## **COPY SAMPLE FILE TEMPLATES:**

```
root@osctrl-mimi-a01:/opt/ceph-ansible#
```

```
cp site.yml.sample site.yml ; cp group_vars/all.yml.sample group_vars/all.yml ; cp
group_vars/mons.yml.sample group_vars/mons.yml ; cp group_vars/osds.yml.sample
group_vars/osds.yml ; cp group_vars/rgws.yml.sample group_vars/rgws.yml
```

---

## **Create ceph\_inventory file:**

```
root@osctrl-ch2-f01:/opt/ceph-ansible# cat ceph_inventory
```

```
[mgrs]
pistoremon-ch2-f[01:03].ece.clifton.net
```

```
[mons]
pistoremon-ch2-f[01:03].ece.clifton.net
```

```
[rgws]
pistorergw-ch2-f[01:02].ece.clifton.net
```

```
[osds]
#pistore-ch2-f[01:24].ece.clifton.net
pistore-ch2-f25.ece.clifton.net
#pistore-ch2-f26.ece.clifton.net #storage degraded
pistore-ch2-f[27:32].ece.clifton.net
#pistore-ch2-f33.ece.clifton.net
pistore-ch2-f[34:35].ece.clifton.net
```

#pistore-ch2-f036.ece.clifton.net  
pistore-ch2-f[37:38].ece.clifton.net

---

## TEST PING TO EVERY CEPH NODE FROM CONTROLLER:

**root@osctrl-ch2-f01:/opt/ceph-ansible# ansible -i ceph\_inventory all -m ping -f 1**

```
pistoremon-ch2-f01.ece.clifton.net | SUCCESS => {
  "changed": false,
  "ping": "pong"
}
pistoremon-ch2-f02.ece.clifton.net | SUCCESS => {
  "changed": false,
  "ping": "pong"
}
